Wrong tensors, successful steps

One recorded trial

Correct average

0	1	2	4

One attacked peer’s output

1.75	0.75	1.5	3.0

Across five paired trials

Corrupted trials	
Control	**0 / 5**
Attack	**5 / 5**

20/20 attacked outputs wrong

All 40 steps completed; tested failure indicators stayed clear.

Tensor corruption measured locally; downstream training damage was not tested.
