3. One group, conflicting reducer indices

Precondition: A is already the group leader.

different
ordered rosters

Same group ID
Same four peers

Reducer index

	0	1	2	3
A's own view	A	F1	F2	F3
Sent to F1	F1	A	F2	F3
Sent to F2	F2	F1	A	F3
Sent to F3	F3	F1	F2	A

Each recipient claims A's reducer slot (index 0 in this example).

Equal-sized slices can be mixed; followers do not cross-check one common roster.
