Agora: continue or skip?

Does this architecture fit our control-plane study?

Stage placement

Assigned centrally at entry;
workers stay in their assigned stage.

Group formation

Rosters rebuilt each averaging round;
no Hivemind-style leader election.

Hivemind lineage

Shared foundations, with different
coordination and trust assumptions.

Possible research angle

Can a peer influence its stage or
trainer/worker assignment? Untested.

Continue: assess Agora as a comparison case

Skip: save time for the main study

Sources: Agora paper §§3.3.1, 3.6.1; pinned matchmaking implementation. Research question is untested.
